PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student focusing on IoT and Cybersecurity. Skilled in programming and web development, with hands-on practice through academic projects and workshops. Actively learning to apply technical concepts in real-world scenarios and keen to develop practical skills in secure systems and embedded technologies.

EDUCATION

Bachelor of Engineering in Computer Science with IoT, Cybersecurity including Blockchain Technology

P.A. College of Engineering, Mangalore, Karnataka

Graduating in: 2027

GPA: 9.2/10.00

PROJECTS

Project Title: Rain Sensor Automation System

Designed and implemented a rain detection system using Arduino and moisture sensors, reducing unnecessary water usage in small garden setups by 70%.

Project Title: RFID Toll Collection System

Built an RFID-based toll gate system that reduced vehicle processing time by 60% and eliminated manual toll collection.

Project Title: ICSB Digital Magazine

Developed a digital magazine using Flask and SQLite to document 25+ departmental events, improving content accessibility and stakeholder engagement.

Project Title: LifeLink-Multilingual Web-Based Life Saving Donation System

Developed a full-stack web application to connect donors and recipients through a centralized, real-time system. Implemented secure registration, admin dashboard, multilingual support, and automated email notifications using Next.js and Firebase.

CERTIFICATIONS

- Networking Basics: Cisco Networking Academy - Completed foundational training in computer networking concepts, including network types, protocols, IP addressing, network devices, and basic troubleshooting. Gained understanding of how data is transmitted across networks and the fundamentals of network security.
- AI for Beginners Certification - Completed a foundational course on Artificial Intelligence, covering core AI concepts, real-world applications, importance of data in AI systems, business use cases, and ethical considerations of AI technologies.
- Google Cloud Skills Boost – Generative AI – Completed 20+ hours of hands-on training in generative AI and deep learning concepts using Google Cloud.
- CS50x: Introduction to Computer Science – Harvard University Completed an in-depth course covering algorithms, data structures, web development, and problem-solving using C, Python, SQL, and more.
- [Nitte] Hackathon (24-hour) - Developed an AI-driven LinkedIn sentiment analysis tool for influencer reputation management.

SKILLS

Technical Skills: Programming: Python, Web Development: HTML, CSS

Computer: Microsoft Excel, PowerPoint

Language: Fluent English
